HDPE SNAP-TOP CANISTERS & LIDS

PRECISION CONCEPTS

Seal in Freshness with Snap-Top Canisters

Engineered for reliability and shelf appeal, our snap-top canisters are designed to maintain product freshness, moisture control, and ease of use across a wide range of applications. Whether used for sanitizing wipes, food products, or specialty formulations, our canisters deliver leak resistance, durability, and secure sealing to protect your contents.

Supported by high-speed molding, automated quality inspection, and responsive lead times, we help brands achieve packaging performance that aligns with both consumer expectations and sustainability goals.

We manufacture a wide selection of HDPE snap-top canisters for premoistened wet wipes and certain foods & beverages. We offer canisters with neck sizes of 80, 105, and 120 mm, as well as matching lids with many unique well types. Additionally, we offer single, double, and triple seals to meet production needs. Standard colors are white and natural, with custom colors available upon request. Choose from several wall designs, such as chimed, straight-wall, tapered, contour, and step-base, to accommodate your marketing and labeling requirements. We can produce the canisters at standard weight or in a lightweight design, providing the same storage capacity but with less plastic. Canisters are recyclable and can be produced from 0 - 100% post-consumer materials (PCR).
